Slide upper center bracket (verify you have the UPPER CENTER BRACKET as shown in contents photo) into position, matching the pre-drilled holes in the shelf or for custom spacing- you may have to drill holes that match your preference. You will use (2) of the Nut/Bolts provided to attach.

Slide the lower center bracket through the support rods on the lower level of the rack. This bracket slides to which ever preferred spot you need and is then attached to the wall of your trailer upon installation.

NOTE: Center Bracket is not needed nor included with 4 jug rack.

Attach the remaining end plate to the rods, using the provided bolts that came with the rods and then attach to the upper shelf, using the (2) remaining Nut/Bolts provided. Your rack should now be completed and ready for install in your trailer.
